

Integrated Results-Based Monitoring & Evaluation

CeDRE International
Training Program

Program Overview

Monitoring & Evaluation is an internal component of the IRBM system and is crucial for integrating all other results and performance management components. It helps to integrate the development plan with the budget and personnel performance systems. It is the single-most important ingredient for measuring and reporting performance for any level from the policy level to the grass-root level and across all entities.

This course is also supported by E-Monitoring & Evaluation Software Application: **PReMaS**®.

PReMaS is the "Performance & Results Management Solution – an integrated application solution for whole-of-government performance planning and management. Comprises integrated modules covering: development and program performance planning using KRA/KPIs, monitoring, and reporting using performance analytics and executive dashboards.

Learning Outcomes

This course is basically designed to help improve the understanding on all aspects of monitoring and evaluation and to improve the ability of participants to customize and apply the knowledge and skills on M&E for their own organizational, program, or project setting. The expected preliminary outcomes of the course are improved:

- ♦ Understanding of the **usefulness of M&E** as a performance management tool
- ♦ **Understanding the differences between M and E** and how to utilize them for improve performance management
- ♦ **Understanding key M&E approaches and tools** for program/projects performance management
- ♦ Ability to **produce practical M&E designs** crucial for meaningful data collection, analysis and reporting
- ♦ Ability to **draw up robust and defensible program/project performance plans** with practical KPIs
- ♦ **Ability to systematically identify result areas** and their key performance indicators
- ♦ Ability to **use the M&E system** for improved evidence-based decision-making
- ♦ **Understanding the dynamics of e-systems** for building and utilizing a results-based M&E system

Comes with ProLL™
Results-based Program
Planning and Integrated
M&E Planning Tools
